UNITED STATES DISTRICT COURT  
EASTERN DISTRICT OF CALIFORNIA

----oo0oo----

FOSTER POULTRY FARMS, INC.,

Plaintiff,

v.

CERTAIN UNDERWRITERS AT

LLOYD'S, LONDON,

Defendants.

CIV. No. 1:14-953 WBS SAB

MEMORANDUM AND ORDER RE: MOTIONS  
FOR SUMMARY JUDGMENT; MOTION TO  
STRIKE

----oo0oo----

Plaintiff Foster Poultry Farms, Inc. ("Foster") brought this action for declaratory relief and breach of contract against defendants Certain Underwriters at Lloyd's, London ("Insurers"). Presently before the court are Foster's motion for partial summary judgment on its declaratory relief claim and Insurers' motion for summary judgment under Federal Rule of Civil Procedure 56, and Foster's motion to strike the deposition testimony and

1 opinions of Thomas James Hoffman and Dr. William James under  
2 Rules 30(d)(2) and 37(c)(1), respectively.

3 I. Factual and Procedural Background

4 Foster is a poultry producer with its largest chicken  
5 processing plant in Livingston, California (the "Facility").  
6 (O'Connor Decl. ¶ 4 (Docket No. 46-3); Lavella Decl. (Docket Nos.  
7 46-4 to 46-6) Ex. 24 at 36:7-22.) The Facility is comprised of  
8 two processing areas called "Plant 1" and "Plant 2," which share  
9 a common packaging floor. (Lavella Decl. Ex. 24 at 38:20-40:3;  
10 O'Connor Decl. ¶ 5.) Insurers, a group of Lloyd's underwriters  
11 organized into three syndicates,<sup>1</sup> issued a product contamination  
12 insurance policy to Foster, effective May 25, 2013 to May 25,  
13 2014 (the "Policy"). (Lavella Decl. Ex. 1 ("Policy"); Topp Decl.  
14 (Docket Nos. 50-2 to 50-4) Ex. U at 12:17-13:3.) The Policy is  
15 governed by a New York choice of law provision. (Id. at 8.) The  
16 Policy provides coverage for all "Loss" arising out of "Insured  
17 Events" during the policy period. (Id. at 10.) Two types of  
18 Insured Events under the Policy, which are at issue here, are  
19 "Accidental Contamination" and "Government Recall." (Id. at 10,  
20 23.)

21 On October 7, 2013, the United States Department of  
22 Agriculture Food Safety and Inspection Service ("FSIS") issued a  
23 Notice of Intended Enforcement ("NOIE") to suspend the assignment  
24

---

25 <sup>1</sup> "Lloyd's operates as a marketplace for the placement of  
26 insurance. Syndicates made up of individual underwriters insure  
27 risks on behalf of their members. Normally, several syndicates  
28 will provide insurance for a given risk by agreeing to cover a  
percentage of that risk." Alexander & Alexander Servs., Inc. v.  
These Certain Underwriters at Lloyd's, London, England, 136 F.3d  
82, 84 n.2 (2d Cir. 1998).

1 of inspectors at the Facility and withhold marks of inspection  
2 for products produced there, which are required for the products  
3 to be eligible for sale. (Lavella Decl. Ex. 8 ("NOIE").)<sup>2</sup> FSIS  
4 based its notice on the Facility's high prevalence of salmonella,  
5 its implication in a salmonella illness outbreak, and its  
6 noncompliance with federal sanitation regulations. (Id.) Foster  
7 proffered corrective actions in response to the NOIE. (Lavella  
8 Decl. Ex. 9). As a result, FSIS placed the NOIE in deferral to  
9 allow Foster an opportunity to implement those corrective actions  
10 and to achieve compliance. (Lavella Decl. Ex. 2 ("LOC") at 1-2.)

11 On December 6, 2013, FSIS issued Foster a Letter of  
12 Concern that noted Foster's continued failure to remedy the high  
13 incidence of salmonella at the Facility, and informed Foster of  
14 live cockroach sightings at the Facility. (See id.) On January  
15 8, 2014, based on Foster's continued noncompliance and a German  
16 cockroach infestation at the Facility, FSIS issued Foster a  
17 Notice of Suspension ("NOS") suspending the assignment of  
18 inspectors at the Facility and withholding marks of inspection  
19 for the chicken produced there. (Lavella Decl. Ex. 3 ("NOS").)  
20 As a result, the Facility ceased production from January 8, 2014  
21 to January 21, 2014. (O'Connor Decl. ¶¶ 9, 21.)

22 Five days after the issuance, FSIS held the NOS in  
23 abeyance pending Foster's implementation of a comprehensive  
24

---

25 <sup>2</sup> Under FSIS regulations, a "'withholding action' is the  
26 refusal to allow the marks of inspection to be applied to  
27 products. A withholding action may affect all product in the  
28 establishment or product produced by a particular process." 9  
C.F.R. § 500.1(b). "A 'suspension' is an interruption in the  
assignment of program employees to all or part of an  
establishment." Id. § 500.1(c).

1 action plan that included fumigating the Facility. (Lavella  
2 Decl. Ex. 5.) Subsequently, Foster requested FSIS to apply marks  
3 of inspection to its chicken product that was produced on January  
4 7 and 8, 2014. (Lavella Decl. Ex. 7.) FSIS granted Foster's  
5 request as to chicken produced exclusively in Plant 2 on January  
6 8, but denied its request as to all remaining chicken produced at  
7 the Facility on January 7 and 8. (Id.; O'Connor Decl. ¶¶ 16-18.)  
8 Under FSIS supervision, Foster thus destroyed 1.3 million pounds  
9 of the denied chicken, which was ineligible for sale. (O'Connor  
10 Decl. ¶ 18-20; see Lavella Decl. Exs. 6, 7; O'Connor Tr. at  
11 206:23-208:11, 209:25-211:8; Wolff Decl. (Docket Nos. 47-4 to 47-  
12 24) Ex. R at 7 ¶ 7.)

13 Foster submitted a coverage claim with Insurers for  
14 over \$12 million in expenses that it claimed to have incurred as  
15 a result of the NOS. (Lavella Decl. Ex. 11 at 3; Wolff Decl. Ex.  
16 R at 4 ¶ 1.) Foster claimed coverage under the Policy's  
17 Accidental Contamination and Government Recall provisions, but  
18 Insurers denied Foster coverage under both. (Id. Exs. 12-14.)<sup>3</sup>  
19 Foster then instituted this action for declaratory relief and  
20 breach of the insurance contract. (Docket No. 1.) Foster now  
21 moves for partial summary judgment on its declaratory relief  
22 claim and Insurers move for summary judgment on both of Foster's  
23 claims. (Docket Nos. 46, 47.) Foster also moves to strike the  
24 deposition testimony and opinions offered by two of Insurers'  
25 expert witnesses, Thomas James Hoffman and Dr. William James.  
26

---

27 <sup>3</sup> Insurers admit that Foster satisfied the conditions  
28 precedent to coverage in Sections 6(A), 7(B), and 7(G)(i) of the  
Policy. (Docket No. 50-1 ¶ 19.)

1 (Docket No. 54.)

2 II. Analysis

3 Summary judgment is proper "if the movant shows that  
4 there is no genuine dispute as to any material fact and the  
5 movant is entitled to judgment as a matter of law." Fed. R. Civ.  
6 P. 56(a). A material fact is one that could affect the outcome  
7 of the suit, and a genuine issue is one that could permit a  
8 reasonable trier of fact to enter a verdict in the non-moving  
9 party's favor. Anderson v. Liberty Lobby, Inc., 477 U.S. 242,  
10 248 (1986). The party moving for summary judgment bears the  
11 initial burden of establishing the absence of a genuine issue of  
12 material fact and can satisfy this burden by presenting evidence  
13 that negates an essential element of the non-moving party's case.  
14 Celotex Corp. v. Catrett, 477 U.S. 317, 322-23 (1986).

15 Alternatively, the moving party can demonstrate that the non-  
16 movant cannot produce evidence to support an essential element  
17 upon which it will bear the burden of proof at trial. Id.

18 Once the moving party meets its initial burden, the  
19 burden shifts to the non-moving party to "designate specific  
20 facts showing that there is a genuine issue for trial." Id. at  
21 324. To carry this burden, the non-moving party must "do more  
22 than simply show that there is some metaphysical doubt as to the  
23 material facts." Matsushita Elec. Indus. Co. v. Zenith Radio  
24 Corp., 475 U.S. 574, 586 (1986). "The mere existence of a  
25 scintilla of evidence . . . will be insufficient; there must be  
26 evidence on which the jury could reasonably find for the [non-  
27 moving party]." Anderson, 477 U.S. at 252.

1           In deciding a summary judgment motion, the court must  
2 view the evidence in the light most favorable to the non-moving  
3 party and draw all justifiable inferences in its favor. Id. at  
4 255. "Credibility determinations, the weighing of the evidence,  
5 and the drawing of legitimate inferences from the facts are jury  
6 functions, not those of a judge" ruling on a motion for summary  
7 judgment. Id. When parties submit cross-motions for summary  
8 judgment, the court must consider each motion separately to  
9 determine whether either party has met its burden, "giving the  
10 nonmoving party in each instance the benefit of all reasonable  
11 inferences." ACLU of Nev. v. City of Las Vegas, 333 F.3d 1092,  
12 1097 (9th Cir. 2003); see also Fair Hous. Council v. Riverside  
13 Two, 249 F.3d 1132, 1136 (9th Cir. 2001) (when parties submit  
14 cross-motions for summary judgment, "each motion must be  
15 considered on its own merits" and "the court must review the  
16 evidence submitted in support of each cross-motion").

17           A. Principles of Interpretation for Insurance Policies

18           Under New York law, the threshold question of law for  
19 the court to determine is whether a policy's terms are ambiguous.  
20 Duane Reade Inc. v. St. Paul Fire and Marine Ins. Co., 411 F.3d  
21 384, 390 (2d Cir. 2005). An insurance "contract is unambiguous  
22 if the language it uses has a definite and precise meaning" such  
23 that it is reasonably susceptible to one interpretation.  
24 Greenfield v. Philles Records, Inc., 780 N.E.2d 166, 170-71 (N.Y.  
25 2002). An unambiguous contract provision is enforced according  
26 to the plain meaning of its terms, id., and courts commonly refer  
27 to the dictionary to ascertain a provision's plain and ordinary  
28

1 meaning, Ellicott Square Court Corp. v. Mountain Valley Indem.  
2 Co., 634 F.3d 112, 119 (2d Cir. 2011).

3 "Ambiguity is determined by looking within the four  
4 corners of the document, not to outside sources." Riverside S.  
5 Planning Corp. v. CRP/Extell Riverside, L.P., 920 N.E.2d 359, 363  
6 (N.Y. 2009). An insurance policy is ambiguous if "its terms are  
7 subject to more than one reasonable interpretation." Universal  
8 Am. Corp. v. Nat'l Union Fire Ins. Co. of Pittsburgh, 37 N.E.3d  
9 78, 80 (N.Y. 2015). To determine whether an insurance contract  
10 is ambiguous, the court must interpret its terms "according to  
11 common speech and consistent with the reasonable expectations of  
12 the average insured." Cragg v. Allstate Indem. Corp., 950 N.E.2d  
13 500, 500 (2011). In a case involving a policy issued to a  
14 business, the court must also examine the "reasonable expectation  
15 and purpose of the ordinary business [person] when making an  
16 ordinary business contract." Michaels v. City of Buffalo, 651  
17 N.E.2d 1272, 1273 (N.Y. 1995) (citation omitted).

18 The court must take into account not only the policy's  
19 literal language, but whatever may be reasonably implied from  
20 that language, including "any promises which a reasonable person  
21 in the position of the promisee would be justified in  
22 understanding." Sutton v. E. River Sav. Bank, 435 N.E.2d 1075,  
23 1078 (N.Y. 1982) (citation omitted). In construing policy terms  
24 according to these standards, the court should strive to give  
25 meaning and effect to every sentence, clause, and word of the  
26 contract. Northville Indus. Corp. v. Nat'l Union Fire Ins. Co.  
27 of Pittsburgh, 679 N.E.2d 1044, 1048 (N.Y. 1997).  
28

1           If the policy's language is susceptible to more than  
2 one reasonable interpretation, the language is "deemed to be  
3 ambiguous and thus interpreted in favor of the insured." Fed.  
4 Ins. Co. v. Int'l Bus. Machines Corp., 965 N.E.2d 934, 936 (N.Y.  
5 2012); see also Handelsman v. Sea Ins. Co., 647 N.E.2d 1258, 1260  
6 (N.Y. 1994) ("Where there is ambiguity as to the existence of  
7 coverage, doubt is to be resolved in favor of the insured and  
8 against the insurer.").<sup>4</sup> When "an insurer wishes to exclude  
9 certain coverage from its policy obligations, it must do so 'in  
10 clear and unmistakable' language." Fed. Ins. Co., 965 N.E.2d at  
11 938 (citation omitted). Any such exclusions or exceptions must  
12 be specific and clear to be enforced: "[t]hey are not to be  
13 extended by interpretation or implication, but are to be accorded  
14 a strict and narrow construction." Id. (citation omitted).

15           "[B]efore an insurance company is permitted to avoid  
16 policy coverage, it must satisfy the burden which it bears of  
17 establishing that the exclusions or exemptions apply in the  
18 particular case, and that they are subject to no other reasonable  
19 interpretation." Dean v. Tower Ins. Co. of N.Y., 979 N.E.2d  
20 1143, 1145 (N.Y. 2012) (citation omitted). If an "insurance  
21 carrier drafts an ambiguously worded provision and attempts to  
22 limit its liability by relying on it," the court must construe  
23 the language against the carrier. Metro. Prop. & Cas. Ins. Co.  
24 v. Mancuso, 715 N.E.2d 107, 112 (N.Y. 1999). This "exceptionally  
25

---

26           <sup>4</sup> New York follows the "well-settled maxim of contra  
27 proferentem" under which courts resolve ambiguities against the  
28 party who drafted the contract. Graff v. Billet, 477 N.E.2d 212,  
213 (N.Y. 1985); 151 W. Assocs. v. Printsiples Fabric Corp., 460  
N.E.2d 1344, 1345 (N.Y. 1984).

1 strong principle" is particularly enforced where the contract  
2 includes non-negotiable, form policy language that was not chosen  
3 by the insured. Mount Vernon Fire Ins. Co. v. Travelers Indem.  
4 Co., 393 N.E.2d 974, 975 (N.Y. 1979).

5 B. "Accidental Contamination" Provision

6 The Policy defines Accidental Contamination as an error  
7 in the production, processing, or preparation of any Insured  
8 Products "provided that" their use or consumption "has led to or  
9 would lead to bodily injury, sickness, disease or death."

10 (Policy at 11.)<sup>5</sup> It is undisputed that Foster's chicken products  
11 are "Insured Products" under the Policy. (Id. at 12.) The plain  
12 meaning of this provision thus requires that Foster show (1) an  
13 error in the production of its chicken product (2) the  
14 consumption of which "would lead to" bodily injury. Insurers  
15 here denied coverage on the ground that Foster failed to  
16 establish the second element. (Lavella Decl. Exs. 13, 14.) The  
17 court examines each element in turn.

18  
19 \_\_\_\_\_  
20 <sup>5</sup> The court examines only the relevant part of the  
21 definition applicable to the facts here. The full definition  
22 under the Policy provides: "Error in the manufacture, production,  
23 processing, preparation, assembly, blending, mixing, compounding,  
24 packaging or labelling (including instructions for use) of any  
25 Insured Products, or the introduction into an Insured Product of  
26 an ingredient or component that is, unknown to the Insured,  
27 contaminated or unfit for its intended purpose, or error by the  
28 Insured in the storage or distribution of any Insured Products  
whilst in the care or custody of the Insured[;] provided that the  
use or consumption of such Insured Products has led to or would  
lead to: (i) bodily injury, sickness, disease or death of any  
person(s) or animal(s) physically manifesting itself within 365  
days of use or consumption, or (ii) physical damage to or  
destruction of tangible property (other than the Insured Products  
themselves)." (Policy at 11.)

1 Foster states that its failure to comply with federal  
2 sanitation regulations, which resulted in a high incidence of  
3 salmonella and a cockroach infestation at the Facility, was an  
4 "error" in the production of its chicken products because the  
5 "sanitary conditions of a slaughter facility, including that  
6 facility's pest control service, is a fundamental component of a  
7 poultry producer's production process." (Docket No. 51-1 at 13.)  
8 In common usage, an "error" means "a mistake" or "[s]omething  
9 incorrectly done through ignorance or inadvertence." Error,  
10 Black's Law Dictionary (10th ed. 2014); Oxford English Dictionary  
11 Online, <http://www.oed.com/viewdictionaryentry/Entry/64126> (last  
12 visited Oct. 8, 2015); accord Merriam-Webster Online Dictionary,  
13 <http://www.merriam-webster.com/dictionary/error> (last visited  
14 Oct. 8, 2015) (defining "error" as "an act or condition of  
15 ignorant or imprudent deviation from a code of behavior").

16 In its NOIE dated October 2013, FSIS notified Foster of  
17 its failure to comply with sanitation regulations, 9 C.F.R. Parts  
18 416 and 417, based on the Facility's high frequency of salmonella  
19 positives and implication in an "ongoing Salmonella Heidelberg  
20 illness outbreak." (NOIE at 1-2.) FSIS found that the  
21 Facility's control measures and antimicrobial interventions  
22 failed to prevent the production of chicken contaminated with  
23 salmonella, including strains of Salmonella Heidelberg, a  
24 serotype known to cause human illness. (Id. at 4.) The agency  
25 affirmed that adequate control measures and interventions,  
26 including "measures necessary to prevent the persistent  
27 recurrence of Salmonella, . . . are an important, fundamental,  
28

1 and integral aspect of an adequate food safety system.” (Id.)

2 In its Letter of Concern dated December 2013, FSIS  
3 addressed the Facility’s ongoing noncompliance with sanitary  
4 regulations due to ineffective process controls and the  
5 continuing high prevalence of salmonella in Foster’s consumer-  
6 ready chicken products. (See LOC; Lavella Decl. Ex. 18 at  
7 101:20-104:3.) One month later, FSIS issued the NOS because of  
8 the Facility’s “egregious insanitary conditions,” including a  
9 live cockroach infestation. (See NOS.) The Notice stressed that  
10 Foster was unable to ensure that its chicken product was not  
11 adulterated or injurious to health and noted Foster’s overall  
12 failure “to abide by the rules and regulations promulgated under  
13 the Poultry Products Inspection Act.” (See id.) These facts are  
14 undisputed and demonstrate that Foster “incorrectly” or  
15 “mistakenly” implemented sanitary measures that were required by  
16 federal regulations. As the FSIS affirmed, such measures were  
17 also vital to controlling food safety hazards during that  
18 production. (NOIE at 4.) Foster’s failure is thus an “error” in  
19 the production of its chicken products.

20 The evidence also demonstrates that Foster’s regulatory  
21 noncompliance lasted from October 7, 2013 to January 10, 2014.  
22 As indicated in the Letter of Concern, Foster’s corrective  
23 actions in response to the NOIE were ineffective in addressing  
24 the noncompliances that the NOIE identified. (LOC at 3-4.) For  
25 example, the Facility’s 26.7% rate of positive salmonella as of  
26 October 7 was comparable to its 23.3% rate of positive salmonella  
27 eight weeks later on December 6. (Id. at 2.) There is no  
28

1 evidence that Foster achieved regulatory compliance in the one-  
2 month period before the NOS issued on January 8, 2014. To the  
3 contrary, the evidence reveals that the Facility's new pest  
4 control operator, Orkin Pest Services, was employing ineffective  
5 pest control procedures during that time, which allowed pests to  
6 multiply. (Lavella Decl. Ex. 21 at 109:25-110:17; Ex. 24 at  
7 89:21-25, 96:23-97:19, 98:1-99:13.) Foster's noncompliance ended  
8 on January 10, 2014 when FSIS notified it that the Facility  
9 "provided adequate corrective actions to address the  
10 noncompliances identified in the NOS." (Id. Ex. 5 at 3.)  
11 Foster's chicken products from October 7, 2013 to January 10,  
12 2014 were thus "erroneously produced" under the Policy.

13           The second element for Accidental Contamination  
14 coverage requires a showing that Foster's "erroneously produced"  
15 chicken product "would lead to bodily injury, sickness, disease  
16 or death." (Policy at 11.) The Policy, however, does not  
17 specify the manner in which Foster must establish this element.  
18 (See Policy at 11; Lavella Decl. Ex. 22 at 123:20-24.) Insurers  
19 posit that to trigger coverage, Foster must prove actual  
20 contamination in that some harmful matter must have been  
21 introduced into the chicken product. Insurers cite three cases  
22 to support this argument, all of which are distinguishable from  
23 the facts here.

24           In Ruiz Food Products, Inc. v. Catlin Underwriting  
25 U.S., Inc., Civ. No. 1:11-889 BAM, 2012 WL 4050001 (E.D. Cal.  
26 Sept. 13, 2012), the policy at issue provided coverage for "any  
27 accidental or unintentional contamination . . . provided that the  
28

1 use or consumption of Insured product(s)" had resulted in or  
2 would result in bodily injury. Id. at \*7. There, a downstream  
3 manufacturer of hydrolyzed vegetable protein ("HVP") issued a  
4 recall after a finished lot of its HVP product tested positive  
5 for salmonella. Id. at \*1. A different lot of HVP subject to  
6 the recall was sent to a company that used it to produce a beef  
7 spice mix, which the plaintiff Ruiz incorporated into its food  
8 products. Id. at \*2. The HVP constituted only .0007% of Ruiz's  
9 food product. Id.

10 All three companies conducted sample testing on the HPV  
11 that was sent to Ruiz's supplier but the results were all  
12 negative for salmonella. Id. "Only one lot of [the  
13 manufacturer's] HPV tested positive for Salmonella, and that  
14 particular lot was not sent to [Ruiz's beef spice mix supplier],  
15 and thus, did not reach Ruiz." Id. Despite this, the FDA  
16 imposed a recall of Ruiz's food product and Ruiz claimed coverage  
17 under the policy. Id. The court held that the policy required  
18 objectively verifiable evidence of actual contamination: because  
19 all the samples tested by the three companies were negative for  
20 salmonella, there was no evidence that Ruiz's product was in fact  
21 contaminated with salmonella. Id. at \*7. On that basis, Ruiz's  
22 product would not result in bodily injury and therefore was not  
23 covered. Id.

24 In Wornick Co. v. Houston Casualty Co., Civ. No. 1:11-  
25 391, 2013 WL 1832671 (S.D. Ohio May 1, 2013), a company that  
26 manufactured dairy shake packets, which Wornick incorporated into  
27 its food products, issued a voluntary recall after salmonella was  
28

1 found in a finished lot of its packets, causing Wornick to recall  
2 and replace 700,000 cases of its own food product. Id. at \*1-2.  
3 It was later determined that the tainted lot had not been sent to  
4 Wornick and that none of its food products contained salmonella.  
5 Id. at \*2. Wornick's insurer denied a claim under a product  
6 contamination policy similar to the one in Ruiz. Id. The court  
7 held that the term "contamination" in that policy required "that  
8 the insured's product be soiled, stained, corrupted, infected, or  
9 otherwise made impure by contact or mixture." Id. at \*6 (citing  
10 multiple dictionaries). Because there was no evidence that  
11 Wornick's products came into contact with salmonella, they were  
12 not "contaminated" under the policy. Id.

13           Lastly, in Little Lady Foods, Inc. v. Houston Cas. Co.,  
14 819 F. Supp. 2d 759 (N.D. Ill. 2011), Little Lady's testing  
15 revealed that its food products may be contaminated with a  
16 harmful bacteria. Id. at 761. Little Lady put its products on  
17 hold pending further analysis but tests ultimately concluded that  
18 the product contained a harmless bacteria. Id. The court held  
19 that Little Lady was not covered under a contamination policy  
20 similar to the one in Ruiz because none of its products were ever  
21 contaminated with harmful bacteria. Id. at 762-63.

22           According to these cases, Insurers contend that a mere  
23 possibility that Foster's chicken product is contaminated is  
24 insufficient to trigger coverage for Accidental Contamination  
25 under the Policy. None of these three cases, however, apply to  
26 the present facts. The provision here does not contain the word  
27 "contamination." It is triggered by an "error," not actual  
28

1 contamination. (See Policy at 11.) Cases construing the meaning  
2 of the word "contamination" are therefore inapposite.

3  
4 Even if the Policy required Foster to prove "actual  
5 contamination" with evidence that a foreign matter was introduced  
6 into its chicken, that requirement would have been met. It is  
7 undisputed that the "[c]onsumption of food contaminated with  
8 Salmonella can cause salmonellosis, one of the most common  
9 bacterial foodborne illnesses." (Wolff Decl. Ex. L.) The  
10 organism can cause a serious infection that can lead to death and  
11 can also develop resistance to antibiotics. (Id.; NOIE at 3;  
12 O'Connor Tr. at 74:4-12.) The salmonella organism is introduced  
13 into processing facilities when live birds are delivered for  
14 slaughter. (O'Connor Dep. at 72:9-23, 87:15-24.)<sup>6</sup>

15 Unlike the cases cited, here, Foster's chicken product  
16 consistently tested positive for salmonella for half of a year  
17 before Foster destroyed the product for which it claims coverage.  
18 In October 2013, FSIS "identified multiple noncompliances  
19 including . . . direct product contamination" and documented  
20 Foster's failure "to prevent the [Facility's] production of  
21 products contaminated with Salmonella." (NOIE at 4.) In  
22 December 2013, FSIS also notified Foster that about a quarter of  
23 its chicken samples tested positive for salmonella. (LOC at 2.)  
24 FSIS identified an array of insanitary conditions, including the  
25 presence of cockroaches, that could directly and indirectly

---

26 <sup>6</sup> In response to FSIS's December 6, 2013 Letter of  
27 Concern, Foster acknowledged that live chickens containing  
28 salmonella were came into the Facility before processing began,  
which overwhelmed the systems in place to reduce the prevalence  
of salmonella. (Wolff Decl. Ex. Y.)

1 spread salmonella at the Facility. (Id. at 2-3.)

2 On the day of the NOS on January 8, 2014, three out of  
3 eight chicken samples at the Facility tested positive for  
4 salmonella. (Lavella Decl. Ex. 21 at 126:21-127:18; O'Connor Tr.  
5 at 32:22-33:22.)<sup>7</sup> Further evidence of actual contamination is in  
6 the high levels of salmonella that persisted at the Facility  
7 after the NOS was lifted. (Lavella Opp. Ex. 6 at 67:24-72:8,  
8 78:8-81:24, 113:7-114:15; O'Connor Dep. at 66:2-68:13; Wolff  
9 Decl. Exs. L, M.) Foster eventually linked this high prevalence  
10 to live birds that were coming into the Facility from particular  
11 growing farms. (Wolff Decl. Ex. W at 117:6-119:2.)

12 Unlike the food product in Insurers' cited cases, which  
13 were never found to contain any harmful substances, it is  
14 undisputed that Foster's chicken products were actually  
15 contaminated with organisms able to cause a variety of serious  
16 illnesses, infection, and death. (LOC at 3.) Foster even  
17

18 \_\_\_\_\_  
19 <sup>7</sup> Insurers object to Dr. O'Connor's statement regarding  
20 the January 8, 2014 test results on the ground that it lacks  
21 foundation and constitutes hearsay. (Wolff Decl. Ex. G at  
22 185:20-186:7, 198:25-199:9.) Insurers also object to Charles  
Giglio's expert opinion on the ground that it lacks factual basis  
and is "based on speculation or conjecture." (Docket No. 55-1 ¶  
48.)

23 Even if the non-moving party's evidence is presented in  
24 a form that is currently inadmissible, such evidence may be  
25 evaluated on a motion for summary judgment so long as the moving  
26 party's objections could be cured at trial. See Burch v. Regents  
27 of Univ. of Cal., 433 F.Supp.2d 1110, 1119-20 (E.D. Cal. 2006).  
28 Objections to evidence on the ground that the evidence is  
irrelevant, speculative, argumentative, vague and ambiguous, or  
constitutes an improper legal conclusion are all duplicative of  
the summary judgment standard itself. (See id.) Accordingly,  
objections on any of these grounds are superfluous and the court  
will overrule them.

1 satisfies the definition of contamination set forth in Wornick  
2 requiring that a "product be soiled, stained, corrupted,  
3 infected, or otherwise made impure by contact or mixture."  
4 Insurers' contention that Foster's destroyed product was not  
5 actually contaminated thus fails.

6 Insurers' next argument that the presence of salmonella  
7 in fresh chicken product does not by itself render the product  
8 harmful because normal cooking practices destroy the organism is  
9 equally unavailing. In October 2013, FSIS identified the  
10 Facility as the likely source of an outbreak of Salmonella  
11 Heidelberg infections that began in March of that year. (NOIE at  
12 1-2; Lavella Decl. Ex. 21 at 126:21-127:18.) By October 2013,  
13 over two hundred people from fifteen states were hospitalized for  
14 salmonella illness, eighty percent of whom reported that they  
15 consumed Foster's chicken. (NOIE at 2; O'Connor Tr. at 76:1-17.)  
16 An FSIS health alert issued in October 2013 also warned that an  
17 estimated 278 illnesses were reported in eighteen states,  
18 predominantly in California. (Wolff Decl. Ex. L.)

19 In addition, on July 3, 2014, after the NOS, Foster  
20 recalled chicken products that were produced at the Facility from  
21 March 7 through March 13, 2014 because they were associated with  
22 a Salmonella Heidelberg illness outbreak in California. (Lavella  
23 Opp. Ex. 1.) In its official recall notice, FSIS stated that  
24 there was "a reasonable probability that the use of the product  
25 will cause serious, adverse health consequences or death." (Id.  
26 at 17032.) The record evidence establishes that chicken products  
27 containing Salmonella Heidelberg outbreak strains can cause  
28

1 illness even where normal cooking practices are followed. Even  
2 in Ruiz, the case cited by Insurers, the court found "no dispute  
3 that had plaintiff shown that the product was tainted or  
4 contaminated, that consumption 'would result in' injury." Ruiz,  
5 2012 WL 4050001, at \*14.

6 Insurers also state that the provision's "provided  
7 that" connector requires a causal link between Foster's "error"  
8 and any injury that results upon consuming its product. They  
9 argue that Foster must establish that the harm its product would  
10 have caused is directly related to the "error." A plain reading  
11 of the provision, however, shows no such requirement. As a  
12 conjunction, "provided" means "on the condition that," or "and."  
13 Provided, Black's Law Dictionary (10th ed. 2014); Merriam-Webster  
14 Online Dictionary, <http://www.merriam->  
15 [ebster.com/dictionary/provided](http://www.merriam-) (last visited Oct. 8, 2015);  
16 Oxford English Dictionary Online,  
17 <http://www.oed.com/view/Entry/153449> (last visited Oct. 8, 2015).  
18 Black's Law Dictionary provides an example: "a railway car must  
19 be operated by a full crew if it extends for more than 15  
20 continuous miles, provided that a full crew must consist of at  
21 least six railway workers." "That one party to the agreement may  
22 attach a particular, subjective meaning to a term that differs  
23 from the term's plain meaning does not render the term  
24 ambiguous." Slattery Skanska Inc. v. Am. Home Assur. Co., 885  
25 N.Y.S.2d 264, 274 (App. Div. 2009).

26 Construing the words "provided that" as "and," Foster  
27 thus needs to prove only (1) that products were erroneously-  
28

1 produced, and (2) that those products would have caused harm if  
2 consumed. There is no requirement which error or combination of  
3 errors in its production caused the harm. There is also no  
4 requirement stated in the Policy that Foster prove how its  
5 product would have caused harm. The Policy requires that Foster  
6 simply prove that the product was consumed. The Policy further  
7 does not require that Foster show what specific kind of harm  
8 would be caused by the consumption of its product. It states  
9 only that "bodily injury, sickness, disease or death" be shown.

10 As Foster points out, New York courts have construed  
11 the term "bodily injury" broadly in insurance policies. For  
12 example, in Lavanant v. General Accident Insurance Co. of  
13 America, 595 N.E.2d 819 (N.Y. 1992), the Court of Appeals held  
14 that the term "bodily injury, sickness or disease" in a  
15 comprehensive general liability policy permitted the insured to  
16 receive coverage for a claim involving emotional trauma that was  
17 unaccompanied by physical injury. Id. at 822.

18 More importantly, the provision does not use any  
19 language of causation. Courts generally decline requests by  
20 insurance companies to rewrite their policies to make them more  
21 restrictive. E.g., id. As the Court of Appeals recognized in  
22 Lavant, Insurers could have included language of causation in the  
23 Policy, but did not do so. See id.; Mount Vernon Fire Ins. Co.,  
24 393 N.E.2d at 975 (if the insurer intended to have a right under  
25 the policy, "it would have been a simple matter for it to have  
26 said so in so many words"). This is particularly true where  
27 coverage is set out in a "form" policy that was drafted by the  
28

1 insurer and was non-negotiable. Mount Vernon Fire Ins. Co., 393  
2 N.E.2d at 975. It is undisputed here that that the Policy uses  
3 Insurers' standard form language for product contamination  
4 policies. (Lavella Decl. Ex. 22 at 101:9-102:21.)

5 Insurers spend a great deal of their briefs arguing  
6 against Foster's assertion that cockroaches at the Facility may  
7 have contributed to the prevalence of salmonella. As explained  
8 above, the plain language of the Policy does not require that  
9 Foster prove a causal link between the error in production and  
10 the harm that would result if erroneously-produced products were  
11 consumed. See Newmont Mines Ltd. v. Hanover Ins. Co., 784 F.2d  
12 127, 135 (2d Cir. 1986) (under New York law, "words should be  
13 given the meanings ordinarily ascribed to them").

14 Furthermore, Insurers contend that the words "would  
15 lead to bodily injury" require conclusive evidence that Foster's  
16 chicken product would have necessarily caused harm if consumed.  
17 By extension, this means that Foster would need to prove that all  
18 of the chicken that it destroyed would have caused injury to have  
19 received coverage. The court must "construe the policy in a way  
20 that affords a fair meaning to all of the language employed by  
21 the parties in the contract and leaves no provision without force  
22 and effect." Platek v. Town of Hamburg, 26 N.E.3d 1167, 1171  
23 (N.Y. 2015). "Reasonable effort must be made to harmonize all of  
24 the terms of the contract." Hartford Ins. Co. of Midwest v.  
25 Halt, 646 N.Y.S.2d 589, 594 (App. Div. 1996).

26 Here, coverage under the Government Recall provision  
27 requires a "reasonable probability" that Foster's chicken product  
28

1 will cause "serious adverse health consequences or death." Since  
2 the benefits under Government Recall and Accidental Contamination  
3 are congruent throughout much of the Policy, it is logical that  
4 the parties intended the words "would lead to bodily injury" to  
5 have a comparable meaning.

6 The average insured reading the Policy would not  
7 reasonably expect that to receive coverage in the event its  
8 product was contaminated, it would have to prove that each and  
9 every one of its products would cause harm if consumed; a  
10 reasonable probability of such harm occurring would be  
11 sufficient. The construction that the Policy requires a  
12 "likelihood" or "reasonable probability" that products will cause  
13 harm also gives effect to the words "would lead to," since  
14 otherwise, insureds would be held to an unreasonably difficult  
15 standard. It is rarely the case that every single product  
16 produced by a producer is contaminated such that it will cause  
17 harm if consumed. "An insurance contract should not be read so  
18 that some provisions are rendered meaningless." County of  
19 Columbia v. Cont'l Ins. Co., 634 N.E.2d 946, 950 (1994). Taking  
20 into account not just the provision's literal language, but the  
21 inferences that an average insured may be draw from it, it would  
22 be unreasonable for the parties to have intended that Foster bear  
23 such a high burden to receive coverage under this provision.

24 It would also be unreasonable to imply that a product  
25 must first be put into commerce and injure somebody before the  
26 policy will provide coverage. The parties could not have  
27 reasonably interpreted the policy to encourage a producer to sell  
28

1 goods that have been deemed unfit for consumption, risking the  
2 public welfare and subjecting itself to civil liability and  
3 criminal prosecution. Thus, FSIS's consistent findings of  
4 sanitary noncompliance at the Facility since from October 2013 to  
5 January 2014, its findings linking the Facility's chicken to a  
6 salmonella illness outbreak, and its finding of "egregious  
7 sanitary conditions" such that "products may have been rendered  
8 adulterated and/or injurious to health" should be sufficient here  
9 to satisfy the second element here.

10 Even if Insurers' interpretation was reasonable, that  
11 would subject the words at issue to more than one reasonable  
12 interpretation. The ambiguity would thus be construed in favor  
13 of Favor and against Insurers and the result would be the same.  
14 White v. Cont'l Cas. Co., 878 N.E.2d 1019, 1021 (N.Y. 2007).

15 Accordingly, because Foster has established that both  
16 elements of this provision are met and there are no genuine  
17 issues of material fact, the court must grant Foster's motion for  
18 partial summary judgment and deny Insurers' motion for summary  
19 judgment as to Foster's claim for Accidental Contamination  
20 coverage.

21 C. "Government Recall" Provision

22 The Policy defines Government Recall as (1) a voluntary  
23 or compulsory recall of Insured Products arising directly from a  
24 Regulatory Body's<sup>8</sup> determination that there is a reasonable  
25

26 \_\_\_\_\_  
27 <sup>8</sup> "Regulatory Bodies" are defined as "the Food and Drug  
28 Administration, the United States Department of Agriculture [or  
any other U.S.] regulatory body with similar authority with  
regard to food safety." (Policy at 23.)

1 probability that Insured Products will cause "serious adverse  
2 health consequences or death," or (2) a voluntary or compulsory  
3 recall of Insured Products arising directly from a Regulatory  
4 Body's determination that Insured Products at Foster's facilities  
5 "have a reasonable probability of causing serious adverse health  
6 consequences or death" and an order suspending the registration  
7 of those facilities issued in conjunction with or following the  
8 recall. (Policy at 23.)<sup>9</sup>

9 The Policy does not define the term "recall." But it  
10

---

11 <sup>9</sup> The court examines only the relevant part of the  
12 definition applicable to the facts here. The full definition  
13 under the Policy provides: "(1) The recall of Insured Products  
14 which has been initiated (a) voluntarily by the Insured, or (b)  
15 as a result of an order by the Food and Drug Administration, the  
16 United States Department of Agriculture, the Canadian Food  
17 Inspection Agency or any other US or Canadian state or regulatory  
18 body with similar authority with regard to food safety  
19 (Regulatory Bodies), and where either of (a) and (b) above arise  
20 directly from a determination by the Regulatory Bodies that there  
21 is a reasonable probability of Insured Products causing serious  
22 adverse health consequences or death to humans or animals, or  
23 have otherwise been classified as Class I or Class II by the  
24 Regulatory Bodies, or

25 (2) any order of suspension of registration of any of  
26 the Insured's facilities or operations, only in conjunction with  
27 or following the recall of Insured Products per Item 1. above,  
28 which arises directly from a determination by the Regulatory  
Bodies, that Insured Products which have been manufactured,  
processed, packed, received or held by the Insured at the same  
suspended facilities or operations have a reasonable probability  
of causing serious adverse health consequences or death to humans  
or animals, or have otherwise been classified as Class I or Class  
II by the Regulatory Bodies, or

(3) outside the USA or Canada, the recall of Insured  
Products which has been ordered by any country's regularly  
constituted national, federal, state, provincial or local  
regulatory agency or judicial body pursuant to regulations on  
food safety but only in respect to the actual or likely threat of  
Insured Products causing physical bodily injury or death to  
humans or animals." (Policy at 23.)

1 defines a type of Loss called "Recall Expenses" as "costs and  
2 expenses reasonably and necessarily incurred by [Foster] arising  
3 solely and directly out of an Insured Event for the purpose of or  
4 in connection with recalling, withdrawing, reworking, destroying  
5 or replacing Contaminated Products." (Id. at 14, 23.)

6 "Contaminated Products" are defined as "Insured Products which  
7 have been subject to Accidental Contamination [or Government  
8 Recall]." (Id. at 12, 24.) Insurers denied coverage under the  
9 Government Recall provision on the ground that Foster's  
10 destruction of its product did not constitute a "recall" because,  
11 they argue, a recall applies only to products that had first left  
12 Foster's control. (Lavella Decl. Exs. 12, 14.)

13 Foster voluntarily destroyed the product produced on  
14 January 7 and 8. Because the NOS was issued before Foster's  
15 alleged "recall," and not in conjunction with or following it,  
16 Foster may claim coverage only under Item (1) of the provision.  
17 Foster's "recall" arose directly from FSIS's determination that  
18 there was a reasonable probability that Foster's chicken product  
19 at the Facility could cause serious adverse health consequences.  
20 Aside from product that was produced exclusively in Plant 2 on  
21 January 8, FSIS rejected Foster's request for marks of inspection  
22 on all remaining product produced at the Facility on January 7  
23 and 8, on the ground that Foster did not provide substantial  
24 evidence the product was unadulterated. (Id. Ex. 7 at 1.)

25 Foster argues that because the term "recall" should be  
26 interpreted as "cancel" or "revoke," the term encompasses the  
27 voluntary destruction of Insured Product that did not leave  
28

1 Foster's possession. Insurers contend that the term "recall" is  
2 unambiguous and applies only to product that has left Foster's  
3 control. They argue that no "recall" occurred because the  
4 destroyed product never left Foster's possession or entered  
5 commerce.<sup>10</sup> Both parties contend that their definitions comport  
6 with the plain and ordinary meaning of the term "recall."

7 Foster's broader interpretation of "recall" is logical  
8 when read in the context of the Policy's other provisions. The  
9 word "Recall" in "Recall Expenses" appears to be defined as  
10 "recalling, withdrawing, reworking, destroying or replacing"  
11 Contaminated Products, i.e., products subject to Accidental  
12 Contamination or Government Recall. (Lavella Decl. Ex. 1 at 12,  
13 14, 24.) Foster could thus get coverage for Recall Expenses if  
14 it voluntarily (1) destroys product that would lead to "bodily  
15

---

16 <sup>10</sup> Insurers rely on the definition used in FSIS Directive  
17 8080.1 and incorporated in Foster's federally-mandated Recall  
18 Program. (O'Connor Dep. at 185:7-186:1, 186:24-187:10; Wolff  
19 Decl. Ex. J ("Recall Program"); Ex. K.) The definition states  
20 that a "recall" is the voluntary removal of product from commerce  
21 when there is reason to believe that it is adulterated under the  
22 PPIA. (Recall Program at 630 (emphasis added).) The definition  
23 also states that it does not include a "stock recovery," which is  
24 "the removal or correction of product that has not been marketed  
25 or that has not left the direct control of the firm." (Id.)

26 The court is not bound, however, to apply a regulatory  
27 definition to construe a policy term. See Mostow v. State Farm  
28 Ins. Cos., 668 N.E.2d 392, 394-95 (N.Y. 1996); City of Albany v.  
Standard Acc. Ins. Co., 165 N.E.2d 869, 874 (N.Y. 1960); Ins. Co.  
of N. Am. v. Godwin, 361 N.Y.S.2d 461 (App. Div. 1974). In  
addition, a multifaceted term that is undefined in an insurance  
contract "is not given a narrow, technical definition by the  
law." Michaels, 651 N.E.2d at 1273 (citation). "It is  
construed, rather, in accordance with its understanding by the  
average person who . . . relates it to the factual context in  
which it is used." Michaels, 651 N.E.2d at 1273 (citation and  
alterations omitted).

1 injury, sickness, disease or death," regardless whether they were  
2 still in Foster's possession, or (2) destroys product because  
3 FSIS determined that it has a reasonable probability of causing  
4 serious adverse health consequences. If the product is in  
5 Foster's possession at the time it is destroyed, Insurers'  
6 interpretation would allow for coverage under the first fact  
7 pattern, but deny it under the second. This construction would  
8 appear inconsistent in the context of the entire Policy because  
9 the benefits under Accidental Contamination and Government Recall  
10 are otherwise congruent throughout much of the Policy. Foster's  
11 interpretation is thus a reasonable one.

12 An interpretation is also reasonable if it gives effect  
13 and meaning to the terms in a contract. Mellon Bank, 31 F.3d at  
14 115. Several Loss categories appear to contemplate coverage if  
15 Foster destroys product that is still in its possession. "Gross  
16 Profit" considers variable costs that are saved from not selling  
17 the destroyed product. "Recall Expenses" anticipate the costs of  
18 destroying "packaging and labeling material that cannot be  
19 reused," which reasonably applies to product not yet sold. (Id.  
20 at (Q)(viii).) "Pre-Recall Expenses" are defined as the costs of  
21 ascertaining whether Foster's product is contaminated and the  
22 potential effects of such contamination. It is reasonable that  
23 Foster would conduct this inquiry on product that is still in its  
24 control. And because Pre-Recall Expenses focus only on the act  
25 of ascertaining, one could reasonably infer that any action  
26 Foster takes after that, including destroying the product if it  
27 is contaminated, constitutes a "recall."  
28

1            Insurers' more restrictive construction could also be  
2 supported by the Policy's language. Recall Expenses subpart  
3 (Q) (ii) suggests that recalling a product may be synonymous with  
4 withdrawing it--an action likely taken when the product has  
5 already left Foster's possession. Subpart (Q) (vii) covers costs  
6 incurred by retailers, wholesalers, and distributors acting on  
7 behalf of Foster. Thus, it refers to costs associated with  
8 products that have already entered commerce. Subpart (Q) (x)  
9 governs Foster's costs for replacing or reimbursing the value of  
10 Contaminated Products already in customers' possession. From the  
11 Policy's language, a reasonably intelligent person could infer  
12 that "recall" applies only to product that has been sold and left  
13 the Facility. Insurers' interpretation is thus also not  
14 unreasonable.

15            Although Insurers could have expressly done so, they  
16 did not limit the definition of "recall" to products that left  
17 Foster's possession. "Where the risk is well known and there are  
18 terms reasonably apt and precise to describe it, the use of  
19 substantially less certain phraseology, upon which dictionaries  
20 and common understanding may fairly differ, is likely to result  
21 in interpretations favoring coverage rather than exclusion."  
22 Vargas v. Ins. Co. of N. Am., 651 F.2d 838, 841 (2d Cir. 1981)  
23 (citation omitted). Because the term "recall" is reasonably  
24 subject to more than one interpretation, it is "deemed to be  
25 ambiguous and thus interpreted in favor of the insured." Fed.  
26 Ins. Co., 965 N.E.2d at 936. As a result, the court concludes  
27 that Foster's destruction of its chicken product constituted a  
28

1 recall under the terms of the Government Recall provision.  
2 Accordingly, the court must grant Foster's motion for summary  
3 judgment and deny Insurers' motion for summary judgment as to  
4 Foster's claim for coverage under the Government Recall  
5 provision.

6 D. Foster's Motion to Strike

7 Foster moves to strike the deposition testimony and  
8 opinions offered by two of Insurers' expert witnesses, Thomas  
9 James Hoffman and Dr. William James. Foster also requests that  
10 the court exclude these witnesses' trial testimony. Because the  
11 court did not rely on the witnesses' testimony or opinions in  
12 this Order, the court denies Foster's motion to strike as moot  
13 for purposes of summary judgment.

14 As to trial, Foster's request is a premature motion in  
15 limine. It is the court's practice to provide a schedule for all  
16 matters relating to the trial in the Final Pretrial Order. With  
17 regard to the propriety of motions in limine, counsel are advised  
18 that such motions are to be reserved only for those matters that  
19 cannot be resolved during the course of trial and for which the  
20 bell truly cannot be "un-rung."

21 All other legal points can be sufficiently addressed in  
22 the trial briefs, and the court generally hears Daubert motions  
23 during the trial while the expert is on the stand and can be  
24 questioned about considerations relevant to the court's ruling.  
25 See, e.g., Betts v. City of Chicago, 784 F. Supp. 2d 1020, 1023  
26 (N.D. Ill. 2011) ("[E]videntiary rulings should [ordinarily] be  
27 deferred until trial so that questions of foundation, relevancy  
28

1 and potential prejudice may be resolved in proper context.”)  
2 (citation and alterations omitted). The court will therefore  
3 deny Foster’s request to exclude the witnesses’ trial testimony  
4 without prejudice to the matter being addressed in the parties’  
5 trial briefs and any necessary motions in limine being refiled  
6 after the Final Pretrial Conference.

7 IT IS THEREFORE ORDERED that:

8 (1) Foster’s motion for partial summary judgment on its  
9 declaratory relief claim (Docket No. 46) be, and the same hereby  
10 is, GRANTED;

11 (2) Insurers’ motion for summary judgment on both of  
12 Foster’s claims (Docket No. 47) be, and the same hereby is,  
13 DENIED; and

14 (3) Foster’s motion to strike (Docket No. 54) be, and the  
15 same hereby is, DENIED as moot as to summary judgment and DENIED  
16 without prejudice as to trial.

17 Dated: October 9, 2015
